

SOLAR STIK®

12VDC Solar Leash

5-foot Item # 13-1000210

25-foot Item # 13-000058

100-foot Item # 13-000061

Overview

The Solar Leash uses a 3-pin bayonet plug to connect the Solar Stik 200 or 400 to Power Management components with solar charge controllers such as a Power Hub or Power Pak.

All Solar Leashes are designed to maximize the efficiency of power transfer from the solar panel to the hybrid system; longer leashes are constructed of heavier gauge wire to minimize line loss.
